

Assignment 1 –DBMS

Create the Company database following Navathe-Basic-SQL pdf file with the constraints as specified.

The following tables are to be created..

1. Employee
 2. Department
 3. Project
 4. Works_on
 5. Dependent
- Alter

Insert at at least 2 rows in the table

Use Alter command to make changes in the table like adding a new column or deleting a column

Try deleting any row from the table.

Drop the tales and add Foreign key with constraint ON DELETE SET DEFAULT and ON UPDATE CASCADE

Now insert 2 rows each and check updation and deletion
